

**UC San Diego
Department of Emergency Medicine
Division of Biomedical Informatics**

***ACGME Accredited Fellowship
in Clinical Informatics***

The University of California, San Diego (UCSD) Department of Emergency Medicine and Division of Bioinformatics and Department of Medicine, seek outstanding applicants for fellowship training in Clinical Informatics. The training program is an ACGME accredited 2-Year program. We accept applicants that have completed a residency from any specialty.

UCSD is a national leader in the field of health information technology (IT) and innovation. The health system has been recognized as the highest level HIMSS analytics stage 7. The Department of Emergency Medicine has an established record with extramural funding from the NIH, RWJ Foundation, and recent \$15.3m Beacon Community grant from the National Coordinator for Health IT. The Division of Bioinformatics in the Department of Medicine is home for a NIH-funded National Center of Biomedical Computing, and has a NLM grant to support training in a variety of areas including health care and clinical research informatics, translational bioinformatics, and public health informatics. In addition, there is strong collaboration between the UCSD School of Medicine, UCSD Jacobs School of Engineering, one of the nation's top ranked Engineering Schools, and the Qualcomm Institute for Telecommunications and Information Technology located at UCSD. We have also strong ties to the Veteran's Health Administration Health Services Research Unit located on campus.

The successful applicant will have a strong clinical background and interest in pursuing a career in clinical informatics and health IT. In addition to fellowship training, fellows that are EM trained will have the opportunity to work in the department's various clinical settings (level 1 trauma center, urban teaching center, cancer/ cardiovascular/stroke centers, rural hospital, urgent care) with a combined census of over 150,000 annually. Additional EM fellowship programs include: Toxicology, Hyperbarics, Pediatric EM, EMS, Ultrasound, Wilderness Medicine and Research). The goal of the fellowship is to develop outstanding active clinical leaders with expertise in informatics and health IT. Fellows that are from other specialties will have an opportunity to work in their primary board specialty.

**“UCSD is a national leader
in the field of health
information technology
and innovation.”**

Applications are submitted through ERAS.

Send statement of interest to the Fellowship Director:
