

UNIVERSITY of CALIFORNIA  
SAN DIEGO  
SCHOOL OF MEDICINE

The UC San Diego School of Medicine is pleased to announce

**Multi-Disciplinary Research Fellowships in Women's Cardiovascular Disease Health**

sponsored by the American Heart Association.

The training experience employs a trans-disciplinary approach to the prevention of cardiovascular disease in women with a focus on sedentary behavior

This fellowship will focus on characterizing the molecular transducers through which sitting time increases cardiovascular disease risk.

Laboratory-based experience in molecular biology, metabolism, and/or epigenetics is preferred. Familiarity with statistical methods for analyzing large datasets is desired.

The fellow will primarily work with the [Basic Science Project](#) team. However, the fellowship includes training in basic, clinical, population and translational research, as well as practical experience in clinical trial-based biomarker assessment, mechanistic biomarker development, and career development. The fellow will also be exposed to collaborative training with other trainees and investigators of cardiovascular disease.

Training duration is 2 years.

Postdoctoral applicants must have received (or will receive by commencement of training) an advanced degree in medicine (MD) or an equivalent health sciences-related doctoral (e.g., PhD) degree.

Fellows receive a stipend commensurate with their level of training and other benefits. UCSD is committed to representing underserved populations in its fellowship programs.

Initial close date for application submission is **3/1/18**. Applications will be reviewed weekly thereafter until the search is closed.
