

History of this T32 program at UCSD:

The Division of Rheumatology, Allergy and Immunology (RAI) of the UCSD Department of Medicine has a long record of training successful researchers with a focus on rheumatic diseases. The UCSD Rheumatic Diseases Research T32 program was started in the 1980s by the Division's original founder Nathan Zvaifler, transitioning to the leadership of Dr. Harry Bluestein in the 1990s, and UCSD T32 alumnus Dr. Gary Firestein in the 2001-2011 period. Dr. Terkeltaub became PI in 2013, after a decade of service as Associate T32 Director.
