

Postdoctoral Clinical Research Fellow for the Parkinson & Other Movement Disorders Center at UC San Diego

Work, Live, Play in Paradise

Work:

In brand-new facilities with state-of-the-art equipment for translational research

Altman Clinical Translational Research Institute

Jacobs Medical Center

Translational Imaging

Description

The Parkinson & Other Movement Disorders Center of Excellence at UC San Diego is seeking a highly motivated research fellow to work on ongoing phase II state-of-the-art therapeutic clinical trials and NIH biomarker studies of patients with various parkinsonian disorders.

We are expecting a motivated individual with the ability to work independently, as well as part of a research team.

Requirements:

The candidate must have completed a clinical fellowship in movement disorders, acquired a solid publication record and have excellent clinical skills. Strong verbal and written communication skills in English are required. The candidate will play a major role in the

preparation of manuscripts and grants that arise from this work. The Clinical Research fellow is expected to develop and lead their own projects.

Apply by email to movementdisorders@ucsd.edu include CV and three references.

For questions and more information, email: movementdisorders@ucsd.edu or ilitvan@ucsd.edu

Live:

Within biking distance to renowned La Jolla, Del Mar, and Carmel Valley Public School districts (7 miles direct or 8 miles along beautiful Torrey Pines Golf Course and Pacific coastline).
