OB/GYN - Reproductive Health
Assistant, Associate or Full Project Scientist

The Department of Obstetrics, Gynecology and Reproductive Sciences at the University of California, San Diego, (https://ucsd.edu/) is committed to academic excellence and diversity within the faculty, staff and student body and is conducting an open search for Assistant Project Scientist(s).

At UC San Diego, Project Scientists are academic researchers who are expected to make significant and creative contributions to a research team, but are not necessarily leaders of the research team. Project scientist positions are similar to postdoctoral fellow positions, but carry more responsibilities, a higher salary, and are typically of longer duration. Project Scientists are not required to carry out independent research or develop an independent research reputation but will publish and carry out research or creative programs with supervision by faculty. University and public service are encouraged but not required, and this position does not have formal teaching responsibilities.

The Reproductive Health After Cancer research group conducts observational and interventional studies to help survivors of childhood, adolescent and young adult cancers improve their reproductive health. Cancer treatment can affect future fertility, pregnancy and the menopause. Currently, there is limited information to help young survivors, their families and their healthcare providers navigate these complex issues.

Candidates must have a PhD in public health, health behavior or epidemiology and expertise in one or more of the following technical areas:
- Design, implementation and evaluation of health behavior interventions
- Design and conduct of multi-site clinical trials
- Cancer survivorship late effects
- Reproductive health
- NIH grant writing and submissions

Appointment will be at Assistant, Associate or Full Project Scientist level based on background and experience.

A link to full description of the Project Scientist series is provided for your review: http://adminrecords.ucsd.edu/PPM/docs/230-311.html

Applications must be submitted through the University of California San Diego's Academic Personnel RECRUIT system at: https://apol-recruit.ucsd.edu/JPF02610.

Salary is commensurate with qualifications and based on University of California pay scales. The University of California is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, or status as a protected veteran.
