DEPARTMENT OF PHARMACOLOGY
2016 - 2017 SEMINAR SERIES

Tuesdays, 12 - 1 p.m.
Leichtag Building, Rm 107
January 11 in MCC Goldberg Auditorium

September 27: Sonia Sharma
La Jolla Institute for Allergy & Immunology
“Dissecting Innate Immune Type I Interferon Signaling Using Functional Genomics”

October 17: Pierre Vincent
National Scientific Research Center - Paris, France
“Monitoring the Integration of Cyclic Nucleotides Signals in Neurons Using Biosensor Imaging”

November 15: Patrick Hogan
La Jolla Institute for Allergy & Immunology
“Mechanisms of Cellular Calcium Signaling”

November 22: Razelle Kurzrock
Moores Cancer Center, UC San Diego
“Center for Personalized Cancer Therapy: The Era of Genomics and Immunotherapy”

November 29: Napoleone Ferrara
Moores Cancer Center, UC San Diego
“Anti-Angiogenic Therapy from Bench to Clinic”

December 6: John Tesmer
University of Michigan
“Molecular Mechanisms of Effector Regulation by Heterotrimeric G Proteins and Lipids”

December 13: Tony Hunter
Salk Institute for Biological Studies
“Post-Translational Modifications of Proteins in Cell Signaling and Disease”

January 10: Alan Saghatelian
Salk Institute for Biological Studies
“Discovery, Characterization, and Metabolism of Novel Lipids”

January 17: Camilla Svensson
Karolinska Institute
“It Changes Over Time: The Role of Lipoxins, Resolvins, and Lysophosphatic Acid in Experimental Models of RA-Induced Pain”

January 24: Scott B. Hansen
The Scripps Research Institute, Florida
“Lipid Raft Disruption, a Kinetic (Non-Tension) Model for Force Transduction”

January 31: Jerold J. Chun
The Scripps Research Institute UC San Diego
“Lysophospholipid Signaling: From Basic Science to Successful Medicine”

February 7: May Han
Stanford University
“Sphingosine-1-phosphate Signaling in Lymphocyte Activation and Trafficking to the CNS”

February 14: Sarah Spiegel
Virginia Commonwealth University
School of Medicine
“Sphingosine-1-phosphate, from Insipid Lipid to Key Regulator of Lymphocyte Trafficking and the Link Between Inflammation and Cancer”

February 21: Rajat Rohatgi
Stanford University
“Regulation of Hedgehog Signaling by Sterol Lipids”

February 28: Alan V. Smrcka
University of Michigan
“Subcellular Compartmentalization of Phospholipase C Signaling in Cardiac Physiology and Failure”

March 7: Julie D. Saba
University of California, San Francisco
“SGPL1 Mutations Cause Nephrosis with Ichthyosis and Adrenal Insufficiency”

March 14: Michael N. Hall
University of Basel, Switzerland
“mTOR Signaling in Growth and Metabolism”

March 21: Luisa Iruela-Arispe
University of California, Los Angeles
“Critical Regulatory Nodes in Vascular Homeostasis”

March 28: Xiaokun Shu
University of California, San Francisco
“Visualize Spatiotemporal Dynamics of Cell Signaling in Vivo with Rationally Designed Fluorescent Reporters”

April 11: Demet Araç
University of Chicago
“Structural and Functional Basis of Adhesion GPCR Activation”

April 18: Douglas Green
St. Jude Children’s Research Hospital
“Regulated Necrotic Cell Death: To the Edge of Necroptosis and Back”

May 9: Garret A. FitzGerald
University of Pennsylvania
“Unwinding the Molecular Clock in Cardiometabolic Disease”

May 23: Joseph Takahashi
University of Pennsylvania
“Molecular Architecture of the Circadian Clock in Mammals”

May 30: Carla Rothlin
Yale University
“Negative Regulation of Inflammation”
