

Assistant, Associate or Full Professors

The Department of Radiation Medicine and Applied Sciences (<http://radonc.ucsd.edu>) within the School of Medicine at the University of California, San Diego is committed to academic excellence and diversity within the faculty, staff, and student body and is seeking a Radiation Oncologist at the Assistant, Associate or Full Professor level to join a growing team of radiation oncologists, medical physicists and applied scientists at UCSD Moores Cancer Center, an NCI-Designated Comprehensive Cancer Center, and its regional locations in the greater San Diego area.

These positions will have the following role and responsibilities:

- Clinical: The candidate may need to treat patients with other diseases sites as the clinical need arises.
- Education: Provide training, teaching and education of UCSD Radiation Oncology residents, medical students, and visiting radiation oncology residents and other professionals.
- Service: Participate in committees at the departmental, cancer center, university, local, and/or national level, as appropriate.
- Professional Development: Maintenance of applicable medical licenses, board certification, appropriate credentialing relevant to their clinical area of expertise and institutional training requirements as required by UCSD. Continued professional development and integration of new treatment techniques and protocols supported by evidence-based medicine principles.

Candidates must have an MD or equivalent and must be board eligible or board certified by the American Board of Radiology. Candidates must also have or be eligible for a California medical license or equivalent certification/permit as determined by the Medical Board of California.

JPF03309 CNS / Breast Radiation Oncology

This position is based at the Moores Cancer Center in La Jolla, CA. This position will have the following role and responsibilities:

- Clinical: Primary focus is on CNS and Breast malignancies. Candidate will participate in Departmental call/coverage and CNS and Breast tumor boards.
- Research: Engage in a program of scholarly activity, including pursuit of intramural and extramural funding sources to support original research.

Preferred Qualifications:

Candidates with accompanying advanced degrees, such as a Master's degree or PhD in a correlated scientific discipline. Candidates with experience in the area of CNS and/or Breast malignancies are also preferred. Candidates with research methods sufficient to function as principal investigator of investigative pre-clinical and/or clinical research protocols and with a track-record of publications in leading medical journals as first/senior author and/or extramural funding are preferred.
